

**Specification:**  
 All dimensions in mm.

The anode alloy is according to DNVGL-RP-B-401 and MIL-18001.  
 Other compositions can be produced upon request.  
 The center-center distance and the size of the bolt holes can be increased upon request.

Electrochemical capacity: 780 Ah/kg  
 Potential: -1050 mV vs Ag/AgCl reference in seawater
